|------------------------------|--|
| <b>SDG Goal 17</b>           | <b>Partnerships for the goals</b>  |
| <b>SDG Target 17.17</b>      | <b>Encourage and promote effective public, public-private and civil society partnerships, building on the experience and resourcing strategies of partnerships</b> |
| <b>SDG Indicator 17.17.1</b> | <b>Amount in United States dollars committed to public-private partnerships for infrastructure</b>   |
| <b>Time series</b>           | <b>ODA (commitments) to public-private partnerships (PPP) for infrastructure</b>   |

## 1. General information on the time series

- Date of national metadata: 8 August 2022
- National data: <http://sdg-indicators.de/17-17-1/>
- Definition: The time series measures German official development assistance (ODA) to public-private partnerships (PPP) for infrastructure. It is measured in commitments of the resources to the partner country (versus disbursements of resources).  
ODA is defined as aid provided by official agencies that promotes and specifically targets the economic development and welfare of developing countries. For ODA flows, data on the sector of destination are recorded using 5-digit codes so called purpose codes. Infrastructure is defined using the following purpose codes:
  - Water supply and sanitation - large systems (CRS code 14020)
  - Water supply - large systems (CRS code 14021)
  - Sanitation - large systems (CRS code 14022)
  - Basic drinking water supply and basic sanitation (CRS code 14030)
  - Basic drinking water supply (CRS code 14031)
  - Basic sanitation (CRS code 14032)
  - Waste management/disposal (CRS code 14050)
  - Public transport services (CRS code 21012)
  - Road transport (CRS code 2102x)
  - Rail transport (CRS code 21030)
  - Water transport (CRS code 21040)
  - Air transport (CRS code 21050)
  - Telecommunications (CRS code 22020)
  - Information and communication technology (ICT) (CRS code 22040)
  - Energy generation, renewable sources (CRS codes 232xx)
  - Energy generation, non-renewable sources (CRS codes 233xx)
  - Hybrid energy plants (CRS codes 234xx)
  - Heat plants (CRS code 23610)
  - Electric power transmission and distribution (centralised grids) (CRS code 23630)
  - Electric power transmission and distribution (isolated mini-grids) (CRS code 23631)
  - Electric mobility infrastructures (CRS code 23642).
 The differentiation of PPP is done via the channel codes (here PPP without networks).
- Disaggregation: Not available.

## 2. Comparability with the global metadata

- Date of global metadata: September 2020
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-17-17-01.pdf>
- The time series is compliant with the global metadata.

### 3. Data description

- ODA is the resource flows to countries and territories on the OECD Development Assistance Committee (DAC) List of ODA Recipients and to multilateral development institutions that are:
  - i) Provided by official agencies, including state and local governments, or by their executive agencies; and
  - ii) Concessional (i.e. grants and soft loans) and administered with the promotion of the economic development and welfare of developing countries as the main objective.
 The DAC list of countries eligible to receive ODA is updated every three years and is based on per capita income.

### 4. Access to data source

- OECD - Development Finance Data:  
<http://oe.cd/fsd-data>
- OECD - Creditor Reporting System:  
<https://stats.oecd.org/Index.aspx?DataSetCode=crs1>

### 5. Metadata on source data

- General information on ODA as well as recent and future changes in methodology:  
<http://www.oecd.org/dac/financing-sustainable-development/development-finance-standards/What-is-ODA.pdf>
- List of the OECD DAC purpose codes and channel codes:  
<https://www.oecd.org/dac/financing-sustainable-development/development-finance-standards/dacandcrscodelists.htm>

### 6. Timeliness and frequency

- Timeliness: t + 11 months
- Frequency: Annual

### 7. Calculation method

- Unit of measurement: Million EUR; Million USD, constant prices (2019)
- Calculation:

$$\text{ODA (commitments) to public - private partnerships (PPP) for infrastructure} = \frac{\text{ODA commitments to the relevant sectors [MnUSD]}}{\text{Deflators for resource flows [base year = 100]}}$$
