| <b>SDG Goal 15</b>          | <b>Life on land</b>   |
| <b>SDG Target 15.9</b>      | <b>By 2020, integrate ecosystem and biodiversity values into national and local planning, development processes, poverty reduction strategies and accounts</b>  |
| <b>SDG Indicator 15.9.1</b> | (a) Number of countries that have established national targets in accordance with or similar to Kunming-Montreal Global Biodiversity Framework Target 14 in their national biodiversity strategy and action plans and the progress reported towards these targets; and (b) integration of biodiversity into national accounting and reporting systems, defined as implementation of the System of Environmental-Economic Accounting |
| <b>Time series</b>          | (a) Implementation of national targets in accordance with Aichi Biodiversity Target 2 of the Strategic Plan for Biodiversity 2011-2020  |

### 1. General information on the time series

- Date of national metadata: 9 March 2023
- National data: <http://sdg-indicators.de/15-9-1/>
- Definition: The time series measures a score between 0 and 1 for the implementation of a national target for the Aichi Biodiversity Target 2.
- Disaggregation: Not available.

### 2. Comparability with the UN metadata

- Date of UN metadata: July 2024
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-09-01.pdf>
- The time series is compliant with the UN metadata.

### 3. Data description

- The score of the indicator can vary between 0 and 1. A value of 0 means that no national target reflecting Aichi Biodiversity Target 2 has been set. A maximum value of 1 means that a national target exists and progress is on track to exceed it. The evaluation of the score is based on the Sixth National Report for the Convention on Biological Diversity.

### 4. Access to data source

## SDG Goal 15

## Life on land

### SDG Target 15.9

By 2020, integrate ecosystem and biodiversity values into national and local planning, development processes, poverty reduction strategies and accounts

### SDG Indicator 15.9.1

(a) Number of countries that have established national targets in accordance with or similar to Kunming-Montreal Global Biodiversity Framework Target 14 in their national biodiversity strategy and action plans and the progress reported towards these targets; and (b) integration of biodiversity into national accounting and reporting systems, defined as implementation of the System of Environmental-Economic Accounting

### Time series

(b) Implementation of the principles of biodiversity in the SEEA

### 1. General information on the time series

- Date of national metadata: 9 March 2023
- National data: <http://sdg-indicators.de/15-9-1/>
- Definition: The time series measures a score between 0 and 3 for the implementation of biodiversity values into national accounting and reporting systems, defined as implementation of the System of Environmental-Economic Accounting (SEEA).
- Disaggregation: Not available.

### 2. Comparability with the UN metadata

- Date of UN metadata: July 2024
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-09-01.pdf>
- The time series is compliant with the UN metadata.

### 3. Data description

- Data stems from the the Global Assessment of Environmental-Economic Accounting and Supporting Statistics survey administered by the UNSD. The Global Assessment collects information on whether countries are currently planning or implementing System of Environmental-Economic Accounting (SEEA) accounts, the specific accounts being implemented and plans for new/future accounts. The sub-indicator disaggregates implementation into three progressive stages. A score of 0 means "No compilation", 1 means "Compilation", 2 "Dissemination" and 3 "Regular compilation and dissemination".

Since the accounts of the SEEA have been regularly compiled and published in Germany since the mid-1990s, the data presented here are transferred accordingly to the reporting years in which no survey of the Global Assessment of Environmental-Economic Accounting and Supporting Statistics took place.
