

## **SDG Goal 15      Life on land**

**SDG Target 15.9**      **By 2020, integrate ecosystem and biodiversity values into national and local planning, development processes, poverty reduction strategies and accounts**

**SDG Indicator 15.9.1**      **(a) Number of countries that have established national targets in accordance with or similar to Kunming-Montreal Global Biodiversity Framework Target 14 in their national biodiversity strategy and action plans and the progress reported towards these targets; and (b) integration of biodiversity into national accounting and reporting systems, defined as implementation of the System of Environmental-Economic Accounting**

**Time series**      **(a) National strategies and action plans in accordance with the Global Biodiversity Framework**

### **1. General information on the time series**

- Date of national metadata: March 9, 2023
- National data: <https://sdg-indicators.de/15-9-1>
- Definition: The time series shows whether Germany is implementing national strategies and action plans within the framework of the Global Biodiversity Framework.
- Disaggregation: Not available.

### **2. Comparability with the UN metadata**

- Date of UN metadata: July 2024
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-09-01.pdf>
- The time series is compliant with the UN metadata.

### **3. Data description**

- The indicator shows whether Germany is implementing the globally defined targets of the Global Biodiversity Framework in its national strategies and action plans. Until 2020, Aichi Biodiversity Target 2 formed the basis; from 2023 onwards, Target 14 of the Kunming-Montreal Framework for Biodiversity will apply. The information for the indicator is provided by the Federal Ministry for the Environment, Climate Protection, Nature Conservation and Nuclear Safety (BMUKN).

## **SDG Goal 15      Life on land**

**SDG Target 15.9**      **By 2020, integrate ecosystem and biodiversity values into national and local planning, development processes, poverty reduction strategies and accounts**

**SDG Indicator 15.9.1**      **(a) Number of countries that have established national targets in accordance with or similar to Kunming-Montreal Global Biodiversity Framework Target 14 in their national biodiversity strategy and action plans and the progress reported towards these targets**

**Time series**      **(b) Implementation of the principles of biodiversity in the SEEA**

### **1. General information on the time series**

- Date of national metadata: March 9, 2023
- National data: <https://sdg-indicators.de/15-9-1>
- Definition: The time series measures a score between 0 and 3 for the implementation of biodiversity values into national accounting and reporting systems, defined as implementation of the System of Environmental-Economic Accounting (SEEA).
- Disaggregation: Not available.

### **2. Comparability with the UN metadata**

- Date of UN metadata: July 2024
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-09-01.pdf>
- The time series is compliant with the UN metadata.

### **3. Data description**

- Data stems from the the Global Assessment of Environmental-Economic Accounting and Supporting Statistics survey administered by the UNSD. The Global Assessment collects information on whether countries are currently planning or implementing System of Environmental-Economic Accounting (SEEA) accounts, the specific accounts being implemented and plans for new/future accounts. The sub-indicator disaggregates implementation into three progressive stages. A score of 0 means "No compilation", 1 means "Compilation", 2 "Dissemination" and 3 "Regular compilation and dissemination". Since the accounts of the SEEA have been regularly compiled and published in Germany since the mid-1990s, the data presented here are transferred accordingly to the reporting years in which no survey of the Global Assessment of Environmental-Economic Accounting and Supporting Statistics took place.
