| 1    | Article 2 of the Code of Conduct lists ten objectives. Please rank your perception of the relevance of these objectives for the various types of fisheries including inland capture fisheries and aquaculture developments in your country. | 1 = not very relevant<br>3 = relevant<br>5 = extremely relevant |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|
|      | Objectives                                                                                                                                                                                                                                  | Scoring                                                         |
| 1.1  | Establish principles for responsible fishing and fisheries activities considering all their relevant biological, technical, economic, social, environmental and commercial aspects                                                          |                                                                 |
| 1.2  | Establish principles and criteria to implement policies for the conservation of fishery resources, management and development                                                                                                               |                                                                 |
| 1.3  | Serve as an instrument of reference to improve legal and institutional framework for appropriate management measures                                                                                                                        |                                                                 |
| 1.4  | Provide guidance to formulate and implement international agreements and other legal instruments                                                                                                                                            |                                                                 |
| 1.5  | Facilitate and promote co-operation in the conservation of fisheries resources, fisheries management and development                                                                                                                        |                                                                 |
| 1.6  | Promote the contribution of fisheries to food security and food quality giving priority to the nutritional needs of local communities                                                                                                       |                                                                 |
| 1.7  | Promote protection of living aquatic resources and their environments and coastal areas                                                                                                                                                     |                                                                 |
| 1.8  | Promote the trade in fish and fishery products in conformity with relevant international rules                                                                                                                                              |                                                                 |
| 1.9  | Promote research on fisheries as well as on associated ecosystems and relevant environmental factors                                                                                                                                        |                                                                 |
| 1.10 | Provide standards of conduct for all involved in the fisheries sector                                                                                                                                                                       |                                                                 |

| 2            | Please identify up to three main constraints to implementation of the Code in your country and then identify corresponding solutions. |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------|
| Constraint 1 |                                                                                                                                       |
| Solution 1   |                                                                                                                                       |
| Constraint 2 |                                                                                                                                       |
| Solution 2   |                                                                                                                                       |
| Constraint 3 |                                                                                                                                       |
| Solution 3   |                                                                                                                                       |

| 3   | Does your country have a fisheries policy?                                                                                                                       |  |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 3.1 | If yes, are fisheries policies in your country consistent with the Code of Conduct?                                                                              |  |
| 3.2 | If no/partially to 3.1, does your country intend to introduce changes to its fisheries policies to bring them into complete conformity with the Code of Conduct? |  |

| 4   | Is fisheries legislation in your country consistent with the Code of Conduct?                                                             |  |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------|--|
| 4.1 | If no/partially, does your country intend to introduce changes to its fisheries legislation so it is consistent with the Code of Conduct? |  |

|     |                                                                                                                                                                  |  |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 4.2 | If no/partially to 3.1, does your country intend to introduce changes to its fisheries policies to bring them into complete conformity with the Code of Conduct? |  |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|

|   |                                                                                                                                    |
|---|------------------------------------------------------------------------------------------------------------------------------------|
| 5 | Please identify up to three key efforts that have been made to make the Code more widely known and understood within your country. |
|   | Holding of meetings, workshops and seminars targeting primary stakeholders (including education/extension programmes)              |
|   | Training of administration staff                                                                                                   |
|   | Publication and distribution of Code-related documents                                                                             |
|   | Translation of the Code or parts of it                                                                                             |
|   | Development of local guidelines and codes based on the Code                                                                        |
|   | Active advertising of the Code through the media (press, radio, TV and internet)                                                   |
|   | NGO and other project-related activities                                                                                           |
|   | Other                                                                                                                              |

|     |                                                                                                                                                                                                       |         |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 6   | Please indicate the level of priority your country attaches to the following substantive themes that are developed in the Code and in the relevant FAO Technical Guidelines for Responsible Fisheries | Scoring |
| 6.1 | Fisheries Management                                                                                                                                                                                  |         |
| 6.2 | Fishing Operations                                                                                                                                                                                    |         |
| 6.3 | Aquaculture Development                                                                                                                                                                               |         |
| 6.4 | Integration of Fisheries into Coastal and Basin Area Management                                                                                                                                       |         |
| 6.5 | Post-Harvest Practices                                                                                                                                                                                |         |
| 6.6 | Trade                                                                                                                                                                                                 |         |
| 6.7 | Fisheries Research                                                                                                                                                                                    |         |
| 6.8 | Inland Fisheries Development                                                                                                                                                                          |         |

|        |                                                                                                                      | Marine Capture | Inland Capture |
|--------|----------------------------------------------------------------------------------------------------------------------|----------------|----------------|
| 7      | How many of the fisheries in your country have fisheries management plans in place?                                  |                |                |
| 7.1    | If your country has fisheries management plans, how many are currently implemented?                                  |                |                |
| 7.2    | Do your management frameworks:                                                                                       |                |                |
| 7.2.1  | Contain measures to ensure the level of fishing is commensurate with the state of fisheries resources                |                |                |
| 7.2.2  | Contain measures to allow depleted stocks to recover                                                                 |                |                |
| 7.2.3  | Contain stock specific target reference points                                                                       |                |                |
| 7.2.4  | Address selectivity of fishing gear                                                                                  |                |                |
| 7.2.5  | Prohibit destructive fishing methods and practices (e.g. dynamiting and poisoning)                                   |                |                |
| 7.2.6  | Address fishing capacity including the economic conditions under which the fishing industry operates                 |                |                |
| 7.2.7  | Address the biodiversity of aquatic habitats and ecosystems, including the identification of essential fish habitats |                |                |
| 7.2.8  | Provide for stakeholder participation in determining management decisions                                            |                |                |
| 7.2.9  | Address the protection of endangered species                                                                         |                |                |
| 7.2.10 | Address the interests and rights of small-scale fishers                                                              |                |                |
| 7.2.11 | Use precautionary approaches which provide for conservative safety margins in decision making                        |                |                |
| 7.2.12 | Fall within (or constitute an integral part of) wider management plans of the coastal zone/basin or catchment areas  |                |                |

|       |                                                                                                                                                                                                     |  |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 8     | Have you started to formally implement activities/programs seeking to mainstream the ecosystem approach to fisheries (EAF) into fisheries management (marine and/or inland)?                        |  |
| 8.1   | If yes, do these activities/programs do the following:                                                                                                                                              |  |
| 8.1.1 | in consultation with stakeholders, they have agreed on comprehensive objectives that strive for the wellbeing/sustainability of their fisheries in ecological, socio-economic and governance terms; |  |
| 8.1.2 | in order to achieve agreed management objectives, and based on best-available information, they have identified key issues to be addressed by management actions;                                   |  |

|       |                                                                                                                      |  |
|-------|----------------------------------------------------------------------------------------------------------------------|--|
| 8.1.3 | they have established mechanisms to regularly review to what extent agreed management objectives are being achieved. |  |
|-------|----------------------------------------------------------------------------------------------------------------------|--|

|       |                                                                                                                    |  |
|-------|--------------------------------------------------------------------------------------------------------------------|--|
| 9     | For how many stocks has your country developed stock (or resource/multi-species) specific target reference points? |  |
| 9.1   | If your country has developed stock specific target reference points:                                              |  |
| 9.1.1 | Have any been exceeded?                                                                                            |  |
| 9.1.2 | Are any being approached?                                                                                          |  |
| 9.2   | If none, what other indicators or thresholds are used for managing stocks?                                         |  |
| 9.2.1 | Catch/effort indicators (CPUE, gear, nominal catch, numbers of boats, horse power, etc.)                           |  |
| 9.2.2 | Ecosystem indicators (carrying capacity, habitat integrity or health, etc.)                                        |  |
| 9.2.3 | Socio-economic indicators (consumption data, prices, etc.)                                                         |  |
| 9.2.4 | Validated stakeholder knowledge                                                                                    |  |
| 9.2.5 | Other                                                                                                              |  |
| 9.3   | If exceeded, what action has been taken to remedy the situation?                                                   |  |
| 9.3.1 | Effecting capacity adjustments (vessel and fisher numbers, GRT, HP, gear specifications, etc.)                     |  |
| 9.3.2 | Limiting fishing effort (TACs; quotas; days at sea, seasonal and area closures, etc.)                              |  |
| 9.3.3 | Strengthening MCS                                                                                                  |  |
| 9.3.4 | Carrying out research                                                                                              |  |
| 9.3.5 | Closing fishery                                                                                                    |  |
| 9.3.6 | Other                                                                                                              |  |

|    |                                                                                                                                                                                                                 |  |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 10 | Please identify up to three of the most important steps your country has taken to ensure that only fishing operations authorized by the licensing authority are conducted within waters under its jurisdiction? |  |
|    | Strengthening MCS system (including VMS, at-sea and air surveillance, observers, inspections at sea and in port, pre-licensing inspection, regional cooperation)                                                |  |
|    | Deterrent penalties and sanctions                                                                                                                                                                               |  |
|    | Existence of a vessel register                                                                                                                                                                                  |  |
|    | Effective collaboration between vessel registration and fisheries licensing authorities                                                                                                                         |  |
|    | Mandatory logbook and reporting system                                                                                                                                                                          |  |
|    | NPOA-IUU development and implementation                                                                                                                                                                         |  |
|    | Mandatory landing of catch in national port and/or prohibition to tranship at sea                                                                                                                               |  |
|    | Strengthening Port State Measures                                                                                                                                                                               |  |

|    |                                                                                                                                                                                                                                                                                                   |  |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 11 | Please identify up to three of the most important steps your country has taken to ensure that fishing activities of vessels flying its flag undertaken in international waters or waters under the jurisdiction of another State are reported, monitored and carried out in a responsible manner? |  |
|    | Mandatory authorization/licence to operate beyond EEZ (including relevant licence provisions)                                                                                                                                                                                                     |  |
|    | Ratification and implementation of relevant international instruments                                                                                                                                                                                                                             |  |
|    | Enforcing compliance with laws of other States, and applicable RFMO measures                                                                                                                                                                                                                      |  |
|    | On-board observer programme                                                                                                                                                                                                                                                                       |  |
|    | Mandatory logbooks and reporting system                                                                                                                                                                                                                                                           |  |
|    | Cooperation with third countries and/or with RFMOs                                                                                                                                                                                                                                                |  |
|    | Deterrent penalties and sanctions                                                                                                                                                                                                                                                                 |  |
|    | Pre-licensing inspection and brief                                                                                                                                                                                                                                                                |  |
|    | NPOA and RPOA-IUU development and implementation                                                                                                                                                                                                                                                  |  |
|    | Enhanced MCS measures (at-sea and port inspections, mandatory VMS, etc.)                                                                                                                                                                                                                          |  |
|    | Other                                                                                                                                                                                                                                                                                             |  |

| 12   | Is bycatch and discarding of bycatch occurring in major fisheries in your country? |  |
| 12.1 | Do you formally monitor bycatches and discards?                                    |  |

|        |                                                                                                                         |  |
|--------|-------------------------------------------------------------------------------------------------------------------------|--|
| 12.2   | If yes to 12.1, have you established that there is an issue of unsustainability with respect to bycatch and discards?   |  |
| 12.3   | If yes to 12.2, have you put in place management measures to minimize bycatch and discards?                             |  |
| 12.4   | If yes to 12.3, do these management measures (also) directly:                                                           |  |
| 12.4.1 | address the protection of juveniles?                                                                                    |  |
| 12.4.2 | address the issue of ghost fishing (i.e. fish kills associated to abandoned, lost or otherwise discarded fishing gear)? |  |

|      |                                                                                                                                                                   |  |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 13   | Has your country implemented a vessel monitoring system (VMS) for: (please check one)                                                                             |  |
|      | The entire fishing fleet?                                                                                                                                         |  |
|      | A portion of the fishing fleet?                                                                                                                                   |  |
|      | None of the fishing fleet?                                                                                                                                        |  |
| 13.1 | If your country has not implemented VMS for any of its vessels, is it planning to do so in the future?                                                            |  |
| 13.2 | If your country has not implemented VMS for any of its vessels, is it demanding foreign vessels to carry VMS and report to other monitoring centers (e.g. RFMOs)? |  |

|      |                                                                                                               |  |
|------|---------------------------------------------------------------------------------------------------------------|--|
| 14   | Please rate the following frameworks your country has in place for the development of responsible aquaculture |  |
| 14.1 | Policy framework for the development of responsible aquaculture                                               |  |
| 14.2 | Legal framework for the development of responsible aquaculture                                                |  |
| 14.3 | Institutional framework for the development of responsible aquaculture                                        |  |

|      |                                                                                                                                                                                             |  |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 15   | Has a code or instrument of best practices for aquaculture been adopted by government agencies, producer organizations, suppliers, manufacturers and/or other stakeholders in your country? |  |
| 15.1 | Government agencies                                                                                                                                                                         |  |
| 15.2 | Producer organizations                                                                                                                                                                      |  |
| 15.3 | Suppliers                                                                                                                                                                                   |  |
| 15.4 | Manufacturers                                                                                                                                                                               |  |
| 15.5 | Other stakeholders                                                                                                                                                                          |  |

|        |                                                                                                                                        |  |
|--------|----------------------------------------------------------------------------------------------------------------------------------------|--|
| 16     | Are there (any) procedures in place to:                                                                                                |  |
| 16.1   | Undertake environmental assessments of aquaculture operations?                                                                         |  |
| 16.2   | Monitor aquaculture operations?                                                                                                        |  |
| 16.3   | Minimize the harmful effects of the introduction of non-native species or genetically altered stocks used for aquaculture?             |  |
|        | If yes to any of the above, please provide your assessment of the effectiveness, and identify needs for improvement, of such measures. |  |
| 16.1.1 | Environmental assessments of aquaculture operations                                                                                    |  |
| 16.1.2 | Needs for improvement (if not 'Highly effective')                                                                                      |  |
| 1      | Improve legal framework                                                                                                                |  |
| 2      | Strengthen institutional technical capacity (equipment and HR)                                                                         |  |
| 3      | Improve periodicity and/or coverage of assessment                                                                                      |  |
| 4      | Widen scope of assessment                                                                                                              |  |
| 5      | Lower costs of assessments                                                                                                             |  |
| 6      | Introduce a certification scheme of operators                                                                                          |  |
| 7      | Other                                                                                                                                  |  |
| 16.2.1 | Monitoring aquaculture operations                                                                                                      |  |
| 16.2.2 | Needs for improvement (if not 'Highly effective')                                                                                      |  |
| 1      | Improve legal framework                                                                                                                |  |
| 2      | Strengthen institutional technical capacity (equipment and HR)                                                                         |  |
| 3      | Improve periodicity and/or coverage of monitoring                                                                                      |  |
| 4      | Widen scope of monitoring                                                                                                              |  |

|        |                                                                                                                             |  |
|--------|-----------------------------------------------------------------------------------------------------------------------------|--|
| 5      | Lower costs of monitoring                                                                                                   |  |
| 6      | Develop an aquaculture production database                                                                                  |  |
| 7      | Other                                                                                                                       |  |
| 16.3.1 | Minimizing the harmful effects of the introduction of non-native species or genetically altered stocks used for aquaculture |  |
| 16.3.2 | Needs for improvement (if not 'Highly effective')                                                                           |  |
| 1      | Improve legal framework                                                                                                     |  |
| 2      | Strengthen institutional technical capacity (equipment and HR)                                                              |  |
| 3      | Improve periodicity and/or coverage of inspections                                                                          |  |
| 4      | Carry out more research                                                                                                     |  |
| 5      | Improve monitoring of released species                                                                                      |  |
| 6      | Strengthen institutional collaboration                                                                                      |  |
| 7      | Raise awareness (including translating/adapting source materials for extension)                                             |  |
| 8      | Develop contingency plans                                                                                                   |  |
| 9      | Other                                                                                                                       |  |

|    |                                                                                                                                                                                             |  |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 17 | Please identify up to three of the most important measures that are being / have been implemented to assist rural communities and fish farmers in the development of aquaculture operations |  |
|    | Creating an enabling investment climate                                                                                                                                                     |  |
|    | Facilitating access to credit and grant facilities                                                                                                                                          |  |
|    | Institutional strengthening (structures to work with stakeholders created and staffed)                                                                                                      |  |
|    | Designing and implementing extension programmes / awareness campaigns / training                                                                                                            |  |
|    | Providing improved access to land and titles                                                                                                                                                |  |
|    | Improving access to markets and market information                                                                                                                                          |  |
|    | Assisting farmers to organize into producer associations                                                                                                                                    |  |
|    | Rehabilitating degraded ecosystems (coastal and inland)                                                                                                                                     |  |
|    | Binding stakeholders into national aquaculture planning processes                                                                                                                           |  |
|    | Improving access to feed supplements and other production chain related necessary inputs                                                                                                    |  |
|    | Other                                                                                                                                                                                       |  |

|      |                                                                                                                    |                               |
|------|--------------------------------------------------------------------------------------------------------------------|-------------------------------|
| 18   | Please rate the following frameworks (see below) your country has in place for integrated coastal area management: |                               |
| 18.1 | Policy framework for integrated coastal area management                                                            | N/A                           |
| 18.2 | Legal framework for integrated coastal area management                                                             | Largely complete and enabling |
| 18.3 | Institutional framework for integrated coastal area management                                                     | Largely complete and enabling |

|      |                                                                                                                                                         |         |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 19   | Please indicate the level of conflict in your country within the fisheries sector and between the fisheries sector and the activities of other sectors. |         |
|      | Conflicts between:                                                                                                                                      | Scoring |
| 19.1 | Coastal fisheries and industrial fisheries                                                                                                              | None    |
| 19.2 | Coastal fisheries and coastal aquaculture                                                                                                               | None    |
| 19.3 | Gear types operating in the coastal area                                                                                                                | None    |
| 19.4 | Fisheries and recreational development                                                                                                                  | None    |
| 19.5 | Fisheries and port development                                                                                                                          | None    |
| 19.6 | Fisheries and mineral extraction activities                                                                                                             | None    |

|      |                                                                                                                   |  |
|------|-------------------------------------------------------------------------------------------------------------------|--|
| 20   | Does your country have a mechanism to resolve conflicts over the use of coastal resources in the following areas? |  |
|      | Conflicts between:                                                                                                |  |
| 20.1 | Coastal fisheries and industrial fisheries                                                                        |  |

|                                      |                                             |  |
|--------------------------------------|---------------------------------------------|--|
| 20.2                                 | Coastal fisheries and coastal aquaculture   |  |
| 20.3                                 | Gear types operating in the coastal area    |  |
| 20.4                                 | Fisheries and recreational development      |  |
| 20.5                                 | Fisheries and port development              |  |
| 20.6                                 | Fisheries and mineral extraction activities |  |
| not relevant in absence of conflicts |                                             |  |

|    |                                                                                           |  |
|----|-------------------------------------------------------------------------------------------|--|
| 21 | Is an effective food safety and quality assurance system for fisheries products in place? |  |
|----|-------------------------------------------------------------------------------------------|--|

|    |                                                                                                                                                                                              |  |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 22 | Please list up to three key measures that have been taken by Government to encourage those involved in fish processing, distribution and marketing to reduce post-harvest losses and wastes. |  |
|    | Issuing and implementing food-safety regulations, Codes, Standard Operating Procedures and/or HACCP                                                                                          |  |
|    | Creating a Competent Authority/Regulatory Body                                                                                                                                               |  |
|    | Providing financial incentives (tax breaks and subsidies) for activities aimed at reducing post-harvest losses                                                                               |  |
|    | Promoting by-product utilization and diversification of product use (value addition)                                                                                                         |  |
|    | Enhanced monitoring, control and inspections - fishing vessels, landing sites and processing plants                                                                                          |  |
|    | Pest and residue control programmes (relating to aquaculture)                                                                                                                                |  |
|    | Investing in awareness raising, training and extension programmes                                                                                                                            |  |
|    | Funding Research and Development - waste reduction, new technologies, etc.                                                                                                                   |  |
|    | Providing/improving infrastructure - fish markets, ice plants, cold storage, ice boxes, smoking facilities, etc.                                                                             |  |
|    | Encouraging the founding of professional organizations                                                                                                                                       |  |
|    | Other                                                                                                                                                                                        |  |

|    |                                                                                                                                                                                   |  |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 23 | Please list up to three key measures that have been taken by Government to encourage those involved in fish processing, distribution and marketing to improve the use of bycatch. |  |
|    | Mandatory landing of bycatch in given fisheries                                                                                                                                   |  |
|    | Awareness raising and training/dialogue with processors                                                                                                                           |  |
|    | Strengthening the relationship between producers, processors and distributors                                                                                                     |  |
|    | Funding Research and Development programmes and/or pilot projects - maximization of product utilization, diversification and development of new products, etc.                    |  |
|    | Fostering the adoption of new processing techniques and technology                                                                                                                |  |
|    | Assisting processors in the access to new markets                                                                                                                                 |  |
|    | Improving the handling of infrastructures and conservation facilities (securing the chain of custody)                                                                             |  |
|    | Providing financial incentives (tax breaks and subsidies) for bycatch related commercial activities                                                                               |  |
|    | Encouraging immediate onboard processing                                                                                                                                          |  |
|    | Forcing operators to sell all bycatch locally                                                                                                                                     |  |
|    | Other                                                                                                                                                                             |  |

|      |                                                                                         |  |
|------|-----------------------------------------------------------------------------------------|--|
| 24   | Can processors and/or consumers easily identify the origin of the product raw material? |  |
| 24.1 | Processors                                                                              |  |
| 24.2 | Consumers                                                                               |  |

|    |                                                                                                                                                                                                 |  |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 25 | Please list up to three key measures that have been taken by Government to ensure that fish processors, brokers and dealers do not process or trade in illegally harvested fisheries resources. |  |
|    | NPOA-IUU and/or NPOA-Sharks development and implementation                                                                                                                                      |  |
|    | Enhanced control and inspections - at sea, landing sites, ports and processing plants                                                                                                           |  |
|    | Enhanced control and inspections - customs and border control                                                                                                                                   |  |
|    | Sanctioning the processing and/or marketing of illegally harvested resources (including stiffer fines)                                                                                          |  |

|  |                                                                                                                                       |
|--|---------------------------------------------------------------------------------------------------------------------------------------|
|  | Implementing mandatory product traceability systems (fishing vessel to container/market) - including national Certification of Origin |
|  | Limiting the selling of fish to licensed/registered processors, brokers and dealers                                                   |
|  | Limiting the sourcing of products to licensed/registered operators, vessels and/or monitoring landing sites                           |
|  | Applying import restrictions for non-certified products (Certification of Origin)                                                     |
|  | Applying trade restrictions for certain products (e.g. nationally endangered species, etc.)                                           |
|  | Awareness raising and training                                                                                                        |
|  | Other                                                                                                                                 |

|      |                                                                                                                                                           |  |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 26   | For how many stocks have you obtained reliable estimates of the status of the stocks (e.g. biomass or state of exploitation) within the last three years? |  |
| 26.1 | Please represent this as a percentage of the total number of stocks important to your national fisheries.                                                 |  |

|        |                                                                                                                       |  |
|--------|-----------------------------------------------------------------------------------------------------------------------|--|
| 27     | Is your country raising timely, complete and reliable statistics on catch and fishing effort?                         |  |
| 27.1   | Does your country have the qualified personnel needed to generate the necessary data to sustainably manage fisheries? |  |
| 27.1.1 | If no, in what subject areas do you have the greatest need for additional qualified personnel?                        |  |
| 1      |                                                                                                                       |  |
| 2      |                                                                                                                       |  |
| 3      |                                                                                                                       |  |

|       |                                                                                             |    |
|-------|---------------------------------------------------------------------------------------------|----|
| 28    | Please select the sources that are used to provide data for informing fisheries management. |    |
| 28.1  | Research vessel surveys                                                                     | No |
| 28.2  | Mark / recapture surveys (applied research)                                                 | No |
| 28.3  | On-board sampling from commercial vessels (observers)                                       | No |
| 28.4  | In-port / landing site sampling surveys                                                     | No |
| 28.5  | Historical data                                                                             | No |
| 28.6  | Underwater visual census / aerial abundance surveys                                         | No |
| 28.7  | Frame surveys                                                                               | No |
| 28.8  | Socio-economic surveys (including population census)                                        | No |
| 28.9  | Discard and/or bycatch monitoring                                                           | No |
| 28.10 | Routine data collection (logbooks, landings, vessel and licence registers)                  | No |
| 28.11 | FAO and/or RFMO statistics                                                                  | No |
| 28.12 | Processing, market and trade statistics                                                     | No |
| 28.13 | Surveillance/VMS/inspection (MCS) data                                                      | No |
| 28.14 | Comparative data from similar fisheries/ecosystems                                          | No |
| 28.15 | Other                                                                                       | No |

|    |                                                                                           |  |
|----|-------------------------------------------------------------------------------------------|--|
| 29 | Please identify up to three key data gaps in managing your country's fisheries resources. |  |
|    | Catch data (small-scale to industrial)                                                    |  |
|    | Effort data (small-scale to industrial)                                                   |  |
|    | Technical fleet capacity data (small-scale to industrial)                                 |  |
|    | Capacity utilization data (small-scale to industrial)                                     |  |
|    | IUU fishing and/or MCS data                                                               |  |
|    | Landed data                                                                               |  |
|    | Not landed data (e.g. discards and transshipments)                                        |  |
|    | Stock status data (including all biological parameters and baseline data)                 |  |
|    | Ecosystem data (including oceanographic, ecosystem and climate change data)               |  |
|    | Socio-economic data                                                                       |  |

|  |                                             |
|--|---------------------------------------------|
|  | Market / trade / export data                |
|  | Historical / long-term data series (trends) |
|  | Other                                       |

|        |                                                                                                                                                                                                            |  |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 30     | Does your country routinely monitor the state of the marine environment?                                                                                                                                   |  |
| 30.1   | If yes, do these monitoring efforts include the following:                                                                                                                                                 |  |
| 30.1.1 | Regular at-sea sampling of oceanographic parameters (key chemo-physical and biological data) - fixed or mobile stations (including offshore platforms, vessels and remote sensing)                         |  |
| 30.1.2 | Regular sampling of coastal parameters (key chemo-physical and biological data) - fixed or mobile stations (including onshore and offshore platforms, vessels and remote sensing)                          |  |
| 30.1.3 | Regular monitoring of key coastal and offshore habitats (estuaries, coral reefs, mudflats, seabed, etc.) - fixed or mobile stations (including onshore and offshore platforms, vessels and remote sensing) |  |
| 30.2   | Does your country conduct formal research seeking to assess / predict the impact of climate change in fisheries?                                                                                           |  |
| 30.3   | If yes to 30.2, has your country launched any formal programmes to address climate change in fisheries, to mitigate its potential ecological, economic and social impacts, and to build resilience?        |  |

|      |                                                                                                    |    |
|------|----------------------------------------------------------------------------------------------------|----|
| 31   | Has your country carried out that preliminary assessment of fishing capacity?                      |    |
| 31.1 | If no, are there plans underway to commence such an assessment?                                    |    |
| 31.2 | If yes to 31, what is the status of that assessment?                                               |    |
| 31.3 | If yes to 31, has your country started to implement management measures aiming to adjust capacity? |    |
| 31.4 | If yes to 31, what methods have been used to measure capacity in that assessment?                  |    |
| 1    | Based on key fleet and vessel characteristics (no. vessels, GRT, hp, LOA, etc.)                    | No |
| 2    | Based on potential fishing effort that can be generated by a fleet                                 | No |
| 3    | Based on potential catch that can be harvested by a fleet                                          | No |
| 4    | Based on more complex approaches (DEA, bioeconomic analysis, etc.)                                 | No |
| 5    | Other                                                                                              | No |
| 31.5 | Has your country developed and officially started to implement an NPOA-Capacity?                   |    |

|      |                                                                                                                                                                         |     |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 32   | Does your country flag and/or authorize fishing vessels to operate on the high seas?                                                                                    | Yes |
| 32.1 | If yes, do you supply a record of fishing vessels authorized to operate on the high seas to the FAO following the model indicated in the 1993 FAO Compliance Agreement? | Yes |
| 32.2 | If no to 32.1, do you intend to do so in the near future?                                                                                                               | N/A |

|      |                                                                                                                                                |  |
|------|------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 33   | Has fishing overcapacity been identified as a problem affecting fisheries in your country?                                                     |  |
|      | If yes, which three key measures has your country taken in each of the following three domains to mitigate the impact of fishing overcapacity: |  |
| 33.1 | Steps taken to prevent further build-up of overcapacity:                                                                                       |  |
| 1    |                                                                                                                                                |  |
| 2    |                                                                                                                                                |  |
| 3    |                                                                                                                                                |  |
| 33.2 | Steps taken to reduce fishing overcapacity:                                                                                                    |  |
| 1    |                                                                                                                                                |  |
| 2    |                                                                                                                                                |  |
| 3    |                                                                                                                                                |  |
| 33.3 | Measures taken to prevent fishing overcapacity in major fisheries ranked by effectiveness and practicability:                                  |  |
| 1    |                                                                                                                                                |  |
| 2    |                                                                                                                                                |  |
| 3    |                                                                                                                                                |  |

|      |                                                                                                                                                                                                                                          |  |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 34   | Are sharks caught in the waters of your country by foreign vessels, or do your country's vessels conduct directed fisheries for sharks or regularly catch sharks in non-directed fisheries in your country's waters or on the high seas? |  |
| 34.1 | If yes, have you assessed those fisheries to determine if there is a need for improved management of shark resources?                                                                                                                    |  |
| 34.2 | If no to 34.1, is there an intention to conduct such an assessment?                                                                                                                                                                      |  |
| 34.3 | If yes to 34.1, has your assessment concluded that a plan of action is needed?                                                                                                                                                           |  |
| 34.4 | If yes to 34.3, does your country have a national plan of action in place now?                                                                                                                                                           |  |
| 34.5 | If no to 34.4, is there an intention to develop a national plan of action?                                                                                                                                                               |  |

|      |                                                                                                                                     |  |
|------|-------------------------------------------------------------------------------------------------------------------------------------|--|
| 35   | Does your country conduct longline, trawl and/or gillnet fisheries?                                                                 |  |
| 35.1 | If yes, have you assessed any of those fisheries to determine if a problem exists with respect to the incidental catch of seabirds? |  |
| 35.2 | If no to 35.1, is there an intention to conduct such an assessment?                                                                 |  |
| 35.3 | If yes to 35.1, has your assessment concluded that a plan of action is needed?                                                      |  |
| 35.4 | If yes to 35.3, does your country have a national plan of action in place now?                                                      |  |
| 35.5 | If no to 35.4, is there an intention to develop a national plan of action?                                                          |  |

|    |                                                                                                                  |  |
|----|------------------------------------------------------------------------------------------------------------------|--|
| 36 | Please identify up to three key seabird bycatch mitigation measures you have applied to your longline fisheries. |  |
|    | Legal framework improvement (including compliance with RFMO resolutions on the protection of seabirds)           |  |
|    | Observer programme                                                                                               |  |
|    | Mandatory workshops and development of codes of practice (including distribution of seabird ID cards)            |  |
|    | Seabird Avoidance Plan                                                                                           |  |
|    | Mandatory release of birds                                                                                       |  |
|    | Deploying sets at night                                                                                          |  |
|    | Technical measures (sinking rates and colour of lures, tori and streamer lines, side setting, etc.)              |  |
|    | Strategic discarding of refuse and removing hooks from offal                                                     |  |
|    | Spatial measures                                                                                                 |  |
|    | Other                                                                                                            |  |

|    |                                                                                                                              |  |
|----|------------------------------------------------------------------------------------------------------------------------------|--|
| 37 | Please identify up to three key seabird bycatch mitigation measures you have applied to your trawl and/or gillnet fisheries. |  |
|    | Legal framework improvement (including compliance with RFMO resolutions on the protection of seabirds)                       |  |
|    | Bird scaring devices (tori lines, streamer lines)                                                                            |  |
|    | Observer programme                                                                                                           |  |

| 46   | The Voluntary Guidelines for Securing Sustainable Small-Scale Fisheries in the Context of Food Security and Poverty Eradication (SSF Guidelines) were endorsed by COFI in June 2014. Does your country have a specific initiative to implement the SSF Guidelines? | Unknown |
| 46.1 | If yes, please indicate what type of activities are included in the initiative:                                                                                                                                                                                    |         |
|      | Improving tenure security for small-scale fishers and fish workers in accordance with SSF Guidelines paragraphs 5.2-5.12                                                                                                                                           | -       |
|      | Supporting small-scale fisheries actors to take an active part in sustainable resource management in accordance with SSF Guidelines paragraphs 5.13-5.20                                                                                                           | -       |
|      | Promoting social development, employment and decent work in small-scale fisheries in accordance with SSF Guidelines paragraphs 6.2-6.18                                                                                                                            | -       |
|      | Enhancing small-scale fisheries value chains, post-harvest operations and trade in accordance with SSF Guidelines paragraphs 7.1-7.10                                                                                                                              | -       |
|      | Ensuring gender equality in small-scale fisheries in accordance with SSF Guidelines paragraphs 8.1-8.4                                                                                                                                                             | -       |
|      | Addressing disaster risks and climate change in small-scale fisheries in accordance with SSF Guidelines paragraphs 9.1-9.9                                                                                                                                         | -       |
|      | Strengthening institutions in support of SSF and to promote policy coherence, coordination and collaboration in accordance with SSF Guidelines paragraphs 10.1-10.8                                                                                                | -       |
|      | Improving information, research and communication on the contribution of SSF to food security and poverty eradication in accordance with SSF Guidelines paragraphs 11.1-11.11                                                                                      | -       |
|      | Implementing capacity development of fisheries organizations and other stakeholders in accordance with SSF Guidelines paragraphs 12.1-12.4                                                                                                                         | -       |
|      | Establishing or improving monitoring mechanisms and promoting SSF Guidelines implementation in accordance with SSF Guidelines paragraphs 13.1-13.6                                                                                                                 | -       |
|      | Other (please specify)                                                                                                                                                                                                                                             | -       |
| 46.2 | Please identify main constraints and main opportunities for the implementation of the SSF Guidelines in your country                                                                                                                                               |         |

|      |                                                                                                                                               |         |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------|---------|
|      | Main constraints                                                                                                                              |         |
|      | Inappropriate or lack of a legal, regulatory and policy framework                                                                             | -       |
|      | Lack of appropriate financial resources                                                                                                       | -       |
|      | Limited public awareness of importance of small-scale fisheries                                                                               | -       |
|      | Lack of appropriate technical skills (in public and private sector)                                                                           | -       |
|      | Lack of appropriate human resources                                                                                                           | -       |
|      | Conflicting priorities in relation to other sectors (including large-scale fisheries)                                                         | -       |
|      | Lack of organizational structures among small-scale fishers and fish workers                                                                  | -       |
|      | Insufficient coordination with other related administrations (e.g. tourism, industry, finance, labour, health, education, social development) | -       |
|      | Other (please specify)                                                                                                                        | -       |
|      | Main opportunities                                                                                                                            |         |
|      | Existing enabling legal, regulatory and policy framework                                                                                      | -       |
|      | On-going/planned projects, programmes, initiatives                                                                                            | -       |
|      | Public awareness of importance of small-scale fisheries                                                                                       | -       |
|      | Available technical skills (in public and private sector)                                                                                     | -       |
|      | Involvement of small-scale fishers and fishworkers in decision-making processes                                                               | -       |
|      | Involvement of small-scale fishers in fisheries management                                                                                    | -       |
|      | Existing small-scale fisheries organisational structures                                                                                      | -       |
|      | Adequate access for small-scale fishers and fishworkers to financial services                                                                 | -       |
|      | Well-established institutional coordination and collaboration mechanisms                                                                      | -       |
|      | Political (executive and legislative) will to develop small-scale fisheries                                                                   | -       |
|      | Other (please specify)                                                                                                                        | -       |
| 46.3 | If no, does your country intend to implement the SSF Guidelines?                                                                              | Unknown |

|      |                                                                                                                                                                         |         |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 47   | Does your country have mechanisms through which small-scale fishers and fish workers contribute to decision-making processes ?                                          |         |
| 47.1 | If yes, please specify the nature of these mechanisms                                                                                                                   |         |
|      | Existence of advisory/consultative body to the Ministry/Department of Fisheries in which fisher/fishworker participate (representation at national or provincial level) |         |
|      | Involvement of small-scale fishers in fisheries management (representation at fishery level)                                                                            |         |
|      | Involvement of fishers and fishworkers in data collection and research                                                                                                  |         |
|      | Involvement of fishers in monitoring, surveillance and control                                                                                                          |         |
|      | Involvement of fishers and fishworkers in local development processes (e.g. councils, etc.)                                                                             |         |
|      | Other (please specify)                                                                                                                                                  |         |
| 47.2 | Do these mechanisms encourage the active participation of women at any level?                                                                                           | Unknown |
