

SDG Goal 10

Reduced inequalities

SDG Target 10.b

Encourage official development assistance and financial flows, including foreign direct investment, to States where the need is greatest, in particular least developed countries, African countries, small island developing States and land-locked developing countries, in accordance with their national plans and programmes

SDG Indicator 10.b.1

Total resource flows for development (e.g. official development assistance, foreign direct investment and other flows)

Time series

Net financial flows of Official Development Assistance

1. General information on the time series

- Date of national metadata: June 15, 2026
- National data: <https://sdg-indicators.de/10-b-1>
- Definition: This time series presents the net financial flows of German development cooperation to developing countries. It includes:
 - o Official Development Assistance (ODA),
 - o Other Official Flows (OOF),
 - o Officially supported export credits,
 - o Private sector flows at market terms, and
 - o Private grants.

The financial flows are measured as net disbursements to the recipient countries. For ODA, commitments to the recipient countries are also reported.

- Disaggregation: Type of financial flow, Type of Official Development Assistance

2. Comparability with the UN metadata

- Date of UN metadata: December 2025
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-10-0B-01.pdf>

Note: The indicator refers to developing countries, of which Germany is not a member.

- The time series is not compliant with the UN metadata, but provides additional information. The reasons are as follows:
 - o It shows Germany's ODA and OOF, while the UN metadata provides information on the development assistance received from the perspective of developing countries.

3. Data description

- According to the OECD, Official Development Assistance is government support that is specifically “designed to promote the economic and social development of developing countries.”

ODA is an internationally recognised measure agreed within the OECD Development Assistance Committee (DAC). It comprises financial flows provided by official agencies to developing countries, their nationals, or international organisations for the benefit of developing countries. Private contributions and charitable donations are not recorded as ODA.

Other Official Flows are public sector transactions that do not meet the criteria for ODA. OOF includes grants to developing countries for representational or predominantly commercial purposes; bilateral public transactions intended to promote development but with a grant element of less than 25 %; and bilateral public transactions which, regardless of their grant element, are primarily intended to promote exports. By definition, this category includes:

- o export credits granted directly to a recipient of development assistance by a government agency or institution (official direct export credits);
- o the net acquisition by governments and central banks of securities issued by multilateral development banks on market terms;
- o subsidies (grants) to the private sector to facilitate its lending to developing countries; and
- o funds to support private investment.

Officially supported export credits are granted by state-run or state-controlled specialized export credit agencies (ECAs) for commercial purposes to finance a specific purchase of goods or services from the creditor country. They include both official direct export credits (i.e., credits granted by ECAs to facilitate exports to developing countries) and officially guaranteed/insured export credits (i.e., credits provided by the private sector but guaranteed/insured by ECAs to finance an export transaction).

Private sector flows at market terms include, for example, foreign direct investment, portfolio equity (the buying and selling of stocks and shares), and private sector borrowing.

Private grants include grants and other concessional financial flows awarded by non-governmental organizations (NGOs) and other private institutions (e.g., foundations or religious organizations) from Germany to developing countries for development aid and disaster relief.

The DAC List of ODA Recipients is generally revised every three years by the DAC on the basis of the World Bank income classifications.

4. Access to data source

- OECD – ODA to Development Finance [Selections: DAC1: Flows by provider (ODA+OOF+Private); Measure: Official and private flows, Official Development Assistance (ODA), Other Official Flows (OOF), Officially supported export credits, Private flows at market terms, private grants, net; Flow type: Disbursements, net, Commitments]:
