

SDG Goal 17

Partnerships for the goals

SDG Target 17.14

Enhance policy coherence for sustainable development

SDG Indicator 17.14.1

Number of countries with mechanisms in place to enhance policy coherence of sustainable development

Time series

Mechanisms in place to enhance policy coherence of sustainable development

1. General information on the time series

- Date of national metadata: May 13, 2026
- National data: <http://sdg-indicators.de/17-14-1/>
- Definition: The time series shows the development of mechanisms in place to enhance policy coherence of sustainable development in Germany.
- Disaggregation: Not available.

2. Comparability with the UN metadata

- Date of UN metadata: March 2026
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-17-14-01.pdf>
- The time series is compliant with the UN metadata.

3. Data description

- The time series shows the status of the mechanisms in place to enhance policy coherence of sustainable development in Germany. The value is reported as the percentage of points achieved out of a maximum possible total of 96 points.

The underlying assessment is based on a questionnaire from the United Nations Environment Programme (UNEP), which assesses policy coherence for sustainable development across the following eight thematic areas:

1. Political Commitment
2. Long-term Vision
3. The Integration of Sustainable Development into Policy and Finance
4. Whole-of-government Coordination
5. Sub-national Engagement
6. Stakeholder-engagement
7. Impact Assessment
8. Monitoring, Evaluation, and Reporting

Each of these thematic areas is assessed on a scale of 0 to 12 points. Here, 0 indicates the complete absence of the relevant mechanisms, whilst 12 reflects full compliance with all criteria within the respective thematic area.

The overall score is calculated as the sum of the points achieved across all eight thematic areas. This is then set in relation to the maximum possible total score of 96 and subsequently expressed as a percentage.

4. Access to data source

5. Metadata on source data

- Not available.

6. Timeliness and frequency

- Timeliness: Not applicable.
- Frequency: Annual

7. Calculation method

- Unit of measurement: Percentage
- Calculation:

$$\text{Mechanism in place to enhance policy coherence of sustainable development} = \frac{\sum_i \text{National score in domain } i}{96 \text{ (maximal score)}} \cdot 100 [\%]$$

With i {

1. Political Commitment
2. Long-term Vision
3. The Integration of Sustainable Development into Policy and Finance
4. Whole-of-government Coordination
5. Sub-national Engagement
6. Stakeholder-engagement
7. Impact Assessment
8. Monitoring, Evaluation, and Reporting}
