

SDG Goal 6 Clean water and sanitation

SDG Target 6.a	By 2030, expand international cooperation and capacity-building support to developing countries in water- and sanitation-related activities and programmes, including water harvesting, desalination, water efficiency, wastewater treatment, recycling and reuse technologies
SDG Indicator 6.a.1	Amount of water- and sanitation-related official development assistance that is part of a government-coordinated spending plan
Time series	Commitments and gross disbursements of Official Development Assistance for water and sanitation

1. General information on the time series

- Date of national metadata: June 15, 2026
- National data: <https://sdg-indicators.de/6-a-1>
- Definition: The time series shows Germany's commitments and gross disbursements of Official Development Assistance (ODA) for water and sanitation.

The allocation is based on Creditor Reporting System (CRS) purpose codes. The CRS is the OECD's (Organisation for Economic Co-operation and Development) international standard classification system for development finance and is used to classify development cooperation activities by sector and purpose.

The following CRS codes are included:

CRS-Codes 140: Water supply and sanitation
CRS-Code 31140: Agricultural water resources

- Disaggregation: Type of Official Development Assistance

2. Comparability with the UN metadata

- Date of UN metadata: December 2025
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-06-0A-01.pdf>

Note: The indicator refers to developing countries, of which Germany is not a member.

- The time series is not compliant with the UN metadata, but provides additional information. The reasons are as follows:
 - It shows Germany's ODA, while the UN metadata provides information on the development assistance received from the perspective of developing countries.

3. Data description

- According to the OECD, ODA is government support that is specifically "designed to promote the economic and social development of developing countries."

ODA is an internationally recognised measure agreed within the OECD Development Assistance Committee (DAC). It comprises financial flows provided by official agencies

to developing countries, their nationals, or international organisations for the benefit of developing countries. Private contributions and charitable donations are not recorded as ODA.

The DAC List of ODA Recipients is generally revised every three years by the DAC on the basis of the World Bank income classifications.

4. Access to data source

- OECD – ODA for water and sanitation [Selections: CRS Creditor Reporting System (flows); Sector: 140, 31140; Measure: Official Development Assistance; Channel: All channels; Modality: All modalities; Flow type: Disbursements, Commitments]:

5. Metadata on source data

- General information about ODA:
<https://www.oecd.org/en/topics/official-development-assistance-oda.html>
- List of the OECD DAC purpose codes and channel codes:
<https://development-finance-codelists.oecd.org/CodesList.aspx>
- DAC list of ODA Recipients:
<https://www.oecd.org/en/topics/sub-issues/oda-eligibility-and-conditions/dac-list-of-oda-recipients.html#oda-recipients-list>

6. Timeliness and frequency

- Timeliness: t + 11 months
- Frequency: Annual

7. Calculation method

- Unit of measurement: Million EUR; Million USD, constant prices
- Calculation: Not applicable.
