

SDG Goal 3

Good health and well-being

SDG Target 3.2

By 2030, end preventable deaths of newborns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1,000 live births and under-5 mortality to at least as low as 25 per 1,000 live births

SDG Indicator 3.2.2

Neonatal mortality rate

Time series

Neonatal mortality

1. General information on the time series

- Date of national metadata: April 30, 2026
- National data: <https://sdg-indicators.de/3-2-2>
- Definition: The time series shows the number of live-born children who died within the first 28 days of life, per 1,000 live births.
- Disaggregation: Not available.

2. Comparability with the UN metadata

- Date of UN metadata: March 2026
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-03-02-02.pdf>
- The time series is compliant with the UN metadata.

3. Data description

- The data is derived from the statistics on deaths and the statistics on births. Both sets of statistics are compiled by the Federal Statistical Office and are based on administrative data.

4. Access to data source

- Infant deaths (only available in German):
<https://www.destatis.de/DE/Themen/Gesellschaft-Umwelt/Bevoelkerung/Sterbefaelle-Lebenserwartung/Tabellen/saeuglingssterblichkeit.html>
- Live births – GENESIS online 12612-0001:
<https://www-genesis.destatis.de/genesis//online?operation=table&code=12612-0001&bypass=true&language=en>

5. Metadata on source data

- Quality Report –Death statistics (only available in German):
https://www.destatis.de/DE/Methoden/Qualitaet/Qualitaetsberichte/Bevoelkerung/sterbefaelle.pdf?__blob=publicationFile&v=6
- Quality Report – Birth statistics (only available in German):
<https://www.destatis.de/DE/Methoden/Qualitaet/Qualitaetsberichte/Bevoelkerung/geburten.pdf>

6. Timeliness and frequency

- Timeliness: t + 9 months

- Frequency: Annual

7. Calculation method

- Unit of measurement: Per 1,000 live births
- Calculation:

$$\text{Neonatal mortality} = \frac{\text{Deaths under 28 days of age (neonatal deaths) [number]}}{\text{Live births total [number]}} \cdot 1,000$$
